

SiegeWorks Digital Defense Services

Smart Businesses Demand SiegeWorks

Vital business processes must be protected. Creating truly secure global IT infrastructures that prevent information theft and privacy breaches requires highly specialized, cutting edge knowledge. SiegeWorks delivers this expertise, building an impenetrable defense system against computer hackers, viruses, worms, Trojans, spyware, and innumerable internal and external threats. SiegeWorks is a leading global enterprise security services firm, helping clients plan, design, and build bulletproof IT infrastructures.

Unmatched Protection for Data and Applications

Methodologies such as the SiegeWorks Digital Defense Services (SiegeWorks DDS™) Methodology and SiegeWorks Application Fortified Enterprise™ (SAFE™) ensure that clients receive maximum return on investment. SiegeWorks professional services, consulting and integration offerings are based on proprietary and award-winning methodologies and processes second to none, as well as documented industry-leading best practices. Its proven solutions and services serve an international audience and are trusted by Fortune 1000 companies across financial services, energy, utilities, healthcare, biotechnology, pharmaceuticals, telecommunications, legal, retail, technology, and government sectors.

Adapt and Innovate to Mitigate Risks

SiegeWorks' portfolio of services and advanced technology solutions enables clients to quickly assess critical network and application vulnerabilities, implement proactive security strategies, and constantly monitor and adapt to a changing risk environment. It ensures that businesses are protected against loss, legal issues, and audit complications. It guarantees security for information as it is stored and exchanged, allowing companies to protect their brand, evolve their business models, and gain competitive advantage.

SiegeWorks brings years of experience with security for large applications and databases to every engagement. Consultants work closely with each client to design a solution that fortifies the entire network—including business applications and outsourced processes. After an in-depth evaluation of the environment, state-of-the-art technologies are implemented based on prioritization of business-critical data and processes. Remediation, training, and reporting ensure accountability and maximum ROI. Advanced implementations take advantage of SiegeWorks' valuable partnerships with other industry leaders.

Whether a company needs to overhaul their security architecture, or simply to guarantee protection for an e-business initiative, SiegeWorks' experts will implement a strong, scalable solution.

SiegeWorks ISG Services

SiegeWorks ISG (International Services Group) delivers seamless security, privacy, and regulatory compliance. Its offerings include SiegeNET™, SiegeAPP™, and SiegeTECH™.

SiegeNET Network Security Services

Network services include consulting and in-depth risk assessment, penetration testing and gap analysis, strategic business process remediation, regular checkups, "body replacements", management reporting, and remediation consulting.

Risk assessment services include audits, discovery of network topology/environment, and vulnerability assessments. Process remediation services include installation, configuration, introduction of policies/rules, integration, compatibility, testing, and documentation.

SiegeWorks

Digital Defense Services (continued)

SiegeAPP Application Security Services

Security services for applications include thorough audits, vulnerability assessment and remediation, and custom coding for all enterprise and Web applications, databases, and wireless applications. The offering includes documented best practices and a secure coding training course. SiegeAPP covers all major enterprise applications and platforms, including:

By Category:

- Client/Server (DB2, Informix, Oracle, SQL Server, Sybase)
- Collaborative (Email, Groupware, Document, Message Management)
- Compliance and privacy
- Data Warehousing
- E-Commerce
- Enterprise Application Integration (EAI)
- Enterprise Resource Planning (ERP)
- Customer Relationship Management (CRM)
- Federated Identity Management
- Maintenance, Repair and Operations (MRO)
- Personal (Games, Entertainment Software, Home office)
- Security Products (Authentication, Content Filtering, Firewalls, IDS, etc.)
- Web Services (UDDI, SOAP, WSDL)
- Wireless
- XML Applications

By Platform:

- BEA
- IBM
- Java/J2EE (iPlanet, Oracle App Server, WebLogic, WebSphere)
- Microsoft (ASP, COM/DCOM)
- Oracle
- Peoplesoft
- SAP R/3
- Siebel Systems

SiegeTECH Advanced Technology Solutions

SiegeWorks provides the industry's most advanced security implementations, based on documented best practices and security design and planning services. Complete solutions are available for secure network, systems and application integrity, and risk management. Solutions encompass application and content firewalls, Virtual Private Networks (VPN), and Intrusion Detection Systems (IDS/IPS).

SiegeTECH is complemented by:

SiegeDM™ for Data-in-Motion Security Services

SiegeDM is about protecting electronic messages, including e-mail, instant messages, and documents. It includes content filtering, anti-spam, anti-virus, anti-worm, and secure messaging from desktop-to-desktop or organization-to-organization.

SiegeDR™ for Data-at-Rest Security Services

SiegeDR is focused on "active-archiving" solutions for securing static content, including stored e-mail and other messages, documents, images, and graphic content. Vital to such solutions is the ability to instantly retrieve data in response to legal discovery processes and regulatory audits. Legislative requirements, such as SEC 17a-4, require effective and secure archiving solutions.

SiegeWorks Raises the Bar

SiegeWorks' comprehensive method provides a quick and appropriate response to digital attacks. It prioritizes network protection for critical data, and uses adaptive rules to harden the environment. This creates a long-term, strategic solution that delivers business growth, revenue protection, cost savings, and secure information exchange.

A customer-focused approach also ensures that enterprises gain the training and experience needed to capitalize on their investment. SiegeWorks' track record guarantees knowledge and professionalism, intelligent products, smooth transitions, maximum returns, and a breadth and depth that are unmatched in the industry.

Contact

SiegeWorks is headquartered in Dublin CA, with offices in major cities worldwide: Sacramento, Seattle, Salt Lake City, Raleigh NC, Philadelphia, New York City, Tokyo, Manila, Hong Kong, Singapore, Malaysia, Australia, India and Mexico City. Contact SiegeWorks by calling 1-925-224-7720 or locate their nearest sales office at <http://www.siegeworks.com/contact.html>.
