Advanced Technology Solutions

Vital Protection for the Enterprise

Defending a company from attack in today's connected global economy requires powerful digital defense strategies. Every day, enterprises manage a complex web of threats including computer viruses, hackers, Trojans, worms, spyware, and malicious intent. They must assess critical network and application vulnerabilities, implement proactive security techniques, and constantly monitor and adapt to a changing risk environment. SiegeWorks is a company's first line of defense, creating an impenetrable fortress to protect vital assets and business processes.

SiegeWorks is a leading global enterprise security services, consulting, and integration firm. Its offerings are based on proprietary, award-winning methodologies, such as SiegeWorks Digital Defense Services™ (SiegeWorks DDS™), and documented industry-leading best practices. They ensure that clients receive maximum return on investment, ongoing cost savings and revenue protection.

Plan, Design, and Build with True Technical Expertise

SiegeWorks technology consultants assemble industry leading security products to create truly comprehensive, integrated and flexible solutions customized to each client's needs. Solutions safeguard the extended enterprise with multiple layers of protection for the network, desktops, applications, databases, file servers, e-mail servers, Internet gateways, and wireless applications and devices. Deep domain knowledge and strong industry relationships ensure the most appropriate and efficient solutions every time. And SiegeWorks' Elite Forces also provide custom coding to fill any special needs.

SiegeTECH Advanced Technology Solutions

SiegeWorks International Services Group (ISG) provides intelligent threat detection and attack prevention solutions through SiegeTECH, which spans the following areas:

SiegeDM™ for Data-in-Motion Security Services

SiegeDM protects e-mail and IM messages and attachments. It includes encryption, authentication, identity management, content management, anti-spam and anti-virus.

SiegeDR™ for Data-at-Rest Security Services

SiegeDR is focused on "active-archiving" solutions for secure static content, including stored e-mail messages, documents, databases and images.

Content and Application Firewall Solutions

SiegeWorks experts provide firewall audits and upgrade recommendations, and create intelligent, policy-based implementations.

Virtual Private Networks (VPNs)

Specialists ensure that enterprises implement a VPN to maximum efficiency by addressing authentication, firewalls and policy management.

Instant Virtual Extranets (IVE)

IVE solutions extend remote access to mobile employees, customers and partners, while supporting strong security, authentication, authorizations and auditing.

Intrusion Detection & Prevention Systems (IDS, IPS)

More than merely detecting threats, SiegeWorks' experts work with clients to proactively terminate intrusions before they begin.

SiegeTECH

Advanced Technology Solutions (continued)

Distributed Denial of Service (DDoS) Attack Prevention

Digital attack specialists enable advanced prevention of potentially debilitating attacks that exploit vulnerabilities in distributed systems.

Real-time Threat Management

SiegeWorks correlates real-time alerts with critical business processes, so rapid responses can be taken before damage is done.

File Integrity

Consultants use the latest techniques and products to detect intruders who might be tampering with or modifying files, log files and databases.

Patch Management

SiegeWorks develops plans for effective patch management, including assessment, notification, evaluation, deployment and reporting.
